## Appendix F: Manuscript Copyright Permissions

### Chapter 2: Journal of Visualized Experiments Manuscript Permission

Title: Non-Invasive Modulation and Robotic Mapping of Motor Cortex in the Developing Brain

Thank you for publishing your article Non-Invasive Modulation and Robotic Mapping of Motor Cortex in the Developing Brain with JoVE.

You have permission to reuse the following material from it in your thesis or dissertation, pursuant to your Author License Agreement:

Figure(s): 1, 2, 3, 4

Table(s): 1

Text: All text

Please ensure that JoVE is properly cited in the legends as well as the References: "This is adapted from Giuffre, A., Cole, L., Kuo, H. C., Carlson, H. L., Grab, J., Kirton, A., Zewdie, E. Non-Invasive Modulation and Robotic Mapping of Motor Cortex in the Developing Brain. *J. Vis. Exp.* (149), e59594, doi:10.3791/59594 (2019)."

Best regards,

Review

### **Chapter 3: Journal of Physiological Reports Manuscript Permission**

Title: Robotic Transcranial Magnetic Stimulation Motor Maps and Hand Function in Adolescents

Author: Adrianna Giuffre, et al

Publication: PHYSIOLOGICAL REPORTS

Publisher: John Wiley and Sons

Date: Apr 4, 2021

© 2021 The Authors. Physiological Reports published by Wiley Periodicals LLC on behalf of The Physiological Society and the American Physiological Society

Open Access Article

This is an open access article distributed under the terms of the [Creative Commons CC BY](#) license, which permits unrestricted use, distribution, and reproduction in any medium, provided the original work is properly cited.

You are not required to obtain permission to reuse this article.

For an understanding of what is meant by the terms of the Creative Commons License, please refer to [Wiley's Open Access Terms and Conditions](#).

Permission is not required for this type of reuse.

Wiley offers a professional reprint service for high quality reproduction of articles from over 1400 scientific and medical journals. Wiley's reprint service offers:

- Peer reviewed research or reviews
- Tailored collections of articles
- A professional high quality finish
- Glossy journal style color covers
- Company or brand customisation
- Language translations
- Prompt turnaround times and delivery directly to your office, warehouse or congress.

Please contact our Reprints department for a quotation.

## **Chapter 4: Journal of Neurophysiology Manuscript Permission**

Title: Reliability of Robotic Transcranial Magnetic Stimulation Motor Mapping

### **AUTHOR LICENSE POLICY**

Authors grant JNeurosci a license to publish their work and copyright remains with the author.

#### **Author Rights**

Authors do not need to obtain permission to reuse their material, including to:

- ∴ Reuse figures and tables in future works
- ∴ Include articles in theses or dissertations
- ∴ Reprint articles in books or compilations of their work
- ∴ Deposit the accepted manuscript version of their manuscript in an institutional repository or on their personal website. The JNeurosci-formatted PDF may be used 6 months after issue publication, or immediately if published Open Choice.

The original article in JNeurosci must be cited and linked to, where appropriate.

#### **Funder Mandates**

JNeurosci automatically deposits all articles in PubMed Central regardless of funding status.

Articles are deposited once they have appeared in an issue and will be freely available 6 months from the issue date, unless the authors selected Open Choice. Furthermore, authors may deposit their final, accepted manuscript file, including revisions made during peer review, to funder, institutional, or other repositories at any time.

### **PERMISSION TO REUSE JNEUROSCI MATERIAL**

Anyone may reprint original JNeurosci material without requesting permission. A full journal reference and link to the version of record, where appropriate, must be included.

For content published before 2010, a copyright statement (“Copyright [year] Society for Neuroscience”) should be included.

Questions should be directed to [jnpermissions@sfn.org](mailto:jnpermissions@sfn.org).

## **Chapter 5 and Chapter 6: Frontiers in Neuroscience and Human Neuroscience Permission**

Frontiers publishes its own journals (referred to here as Frontiers Journals) and journals owned by third parties (referred to here as Hosted Journals). When we refer to Journals, we include both Frontiers Journals and Hosted Journals. In this Copyright Statement, Websites (with a capitalised W) refers to all Frontiers websites, including those of Hosted Journals. An Owner means Frontiers as owner of all Frontiers Journals, or the respective owner of a Hosted Journal. All content included on these Websites (including Loop), such as text, graphics, logos, button icons, images, video/audio clips, downloads, data compilations and software, is the property of the person or entity who or which owned it prior to submission to Frontiers or to a Hosted Journal. If not owned by Frontiers or an Owner of a Hosted Journal, it is licensed to Frontiers Media SA ("Frontiers"), such Owner or its or their licensees and/or subcontractors. The ownership of copyright in the text of individual articles (including research articles, opinion articles, book reviews, conference proceedings and abstracts) is not affected by its submission to or publication by Frontiers, whether for itself or for a Hosted Journal. Frontiers benefits from a general licence over all content submitted. Hosted Journal Owners benefit from a general licence over all content submitted to their respective Hosted Journals. Frontiers, Hosted Journal Owners and all their users benefit from a [Creative Commons CC-BY licence](#) over all content, as specified below. Images and graphics not forming part of user-contributed materials are the property of or are licensed to Frontiers and may not be downloaded or copied without Frontiers' explicit and specific permission or in accordance with any specific copyright notice attached to that material. The combination of all content on Frontiers websites, and the look and feel of the Frontiers websites, is the property of Frontiers Media SA.

As an author or contributor you grant permission to others to reproduce your articles, including any graphics and third-party materials supplied by you, in accordance with the Frontiers Terms and Conditions. The licence granted to third parties over all contents of each article, including third-party elements, is a Creative Commons Attribution ("CC BY") licence. The current version is CC-BY, version 4.0 (<http://creativecommons.org/licenses/by/4.0/>), and the licence will automatically be updated as and when updated by the Creative Commons organisation. You may include a requirement to reproduce copyright notices but you may not restrict the right to reproduce the entire article, including third-party graphics. This means that you must obtain

any necessary third-party consents and permissions to reproduce third-party materials in your articles submitted to Frontiers.

Article metadata, as defined in [Frontiers' terms and conditions](#), are the property of Frontiers or the Owner of the respective Hosted Journal, and are licensed under [Creative Commons CC0](#) terms. All software used on this site, and the copyright in the code constituting such software, and all intellectual property in all such elements, is the property of or is licensed to Frontiers and its use is restricted in accordance with the [Frontiers Terms and Conditions](#). All copyright, and all rights therein, are protected by national and international copyright laws. Please also see the [Frontiers Terms and Conditions](#). Copyright Statement updated with effect from 16th December 2020.

*Chapter 5: Frontiers in Neuroscience Manuscript Permission*

Keywords: tDCS, HD-tDCS, motor learning, non-invasive brain stimulation, developmental neuroplasticity, child

Citation: Cole L†, Giuffre A†, Ciechanski P, Carlson HL, Zewdie E, Kuo H-C and Kirton A (2018) Effects of High-Definition and Conventional Transcranial Direct-Current Stimulation on Motor Learning in Children. *Front. Neurosci.* 12:787. doi: 10.3389/fnins.2018.00787

Received: 17 August 2018; Accepted: 11 October 2018;

Published: 31 October 2018.
